

Accord Fintech Pvt Ltd
Web API
Documentation Version 1.1

WEB API

An application program interface (API) is a set of routines, protocols, and tools for building software applications. Basically, an API specifies how software components should interact. Additionally, APIs are used when programming graphical user interface (GUI) components.

A server-side web API is a programmatic interface consisting of one or more publicly exposed endpoints to a defined request–response message system, typically expressed in JSON or XML, which is exposed via the web—most commonly by means of an HTTP-based web server.

When you're building APIs on the Web, there are several ways you can build APIs on the Web. These include HTTP/RPC, and what this means is using HTTP in Remote Procedure Call to call into things, like Methods, across the Web.

API calls represent specific operations that your client applications can invoke at runtime to perform tasks. With the help of these methods we can retrieve data from the back end as well as manipulate the database.

We are using **MVC 4** to develop the methods or call used to manipulate the data base. The data base is managed by **SQL server**. The data from these methods are retrieved in JSON Format. This can be customized according to the customer needs.

Each method will have separate URL's and parameters. To retrieve the data, we have to provide the Token No. in the URL along with other parameters. Token no. is an encrypted string which will be provided separately. Without the specific Token No data cannot be retrieved.

GET AMC

This method is used get the list of all AMC's.

URL

<https://mf.accordwebservices.com/MF/GetFunds?token={token}>

Input Parameters

Parameter	Description
Token	Encrypted token

Output

Parameter	Description
amccode	Unique identification code for AMC's
Fund	AMC Name

GET CATEGORY

This method is used get the list of all categories based on the fund.

URL

<https://mf.accordwebservices.com/MF/GetCategory?Fund={Fund}&token={token}>

Input Parameters

Parameter	Description
Fund	Unique code of AMC
Token	Encrypted token

Output

Parameter	Description
classcode	Unique identification code for Category
className	Category Name

GET SCHEME

This method is used to get list of all the schemes based on the category.

URL

<https://mf.accordwebservices.com/MF/GetScheme?Fund={Fund}&Category={Category}&token={token}>

Input Parameters

Parameter	Description
Fund	Unique code of AMC
Category	Category code
Token	Encrypted token

Output

Parameter	Description
SCHEMECODE	Unique identification code for particular scheme
S_NAME	Scheme Name

GET FUND FACT SHEET

This method is used to get the basic info's, ratios, sector allocation, asset allocation, portfolio holdings & market cap/credit ratings of schemes

URL

<https://mf.accordwebservices.com/MF/GetFundFactsheet?SchemeCode={SchemeCode}&token={token}>

Input Parameters

Parameter	Description
Schemecode	Unique code for scheme
Token	Encrypted token

Output

/**/ snapshot_summary /**/

Parameter	Description
SCHEMECODE	Unique identification code for particular scheme
S_NAME	Scheme Name

CATEGORY_CODE	Category code for scheme
CATEGORY_NAME	Category name of scheme
ASSET_TYPE	Asset type of scheme
NAVDATE	NAV Date
NAVRS	NAV in Rs
NETCHANGE	Change in Rs
PER_CHANGE	Change in %
OBJECTIVE	Objective of Scheme
LOCK_IN_PERIOD	Lock in Period for scheme
INCEPT_DATE	Inception date
FUND_MGR1	Fund Manager
FUND_MGR2	Fund Manager
FUND_MGR3	Fund Manager
RISKTYPE	Risk Type of scheme
MININVT	Minimum Investment amount for scheme
SIPMININVEST	Minimum SIP Investment amount for scheme
AUM	AUM
EXPENSE_RATIO	Expense Ratio for scheme
BENCHMARK	Benchmark Index of Scheme
EXIT_LOAD	Exit load
EXIT_REMARKS	Exit Load Remarks
1MONTHRET	1 Month Return %
3MONTHRET	3 Month return %
6MONTHRET	6 Month return %
1YRRET	1 year return %
3YEARRET	3 year return %
5YEARRET	5 year return %

/* ratios ***/**

Parameter	Description
PE	PE Ratio
STANDARDR	Standard Deviation
BETAR	Beta Ratio
SHARPR	Sharpe Ratio
Jenson	Jenson Alpha ratio
TURNOVER_RATIO	Turnover Ratio
Modified_Duration	Modified Duration
Average_Maturity	Average Maturity
YTM	Yield to Maturity

/* asset_allocation ***/**

Parameter	Description
ASSET	Asset Name
HOLDPERCENTAGE	Hold Percentage

/* sector_allocation ***/**

Parameter	Description
INDUSTRY	Industry
VALUE	Value
HOLDPER	Hold Percentage

/* holdings ***/**

Parameter	Description
Compname	Name of Company
MKTVAL	Market Value
HoldPer	Hold Percentage
INVDATE	Holding Date
Status	Status of holding
Instrument	Instrument Name

/** market_cap (for non-debt funds) **/

Parameter	Description
CAP	Market Cap
HOLDPERCENTAGE	Hold Percentage

/** credit_rating (for debt funds) **/

Parameter	Description
Cap	Rating
HOLDPERCENTAGE	Hold Percentage

GET FUND & BENCHMARK PERFORMANCE

This method is used to get the weekly, monthly & yearly returns for scheme & benchmark.

URL

<https://mf.accordwebservices.com/MF/GetFundBenchmarkReturns?SchemeCode={SchemeCode}&token={token}>

Input Parameters

Parameter	Description
Schemecode	Unique code for scheme
Token	Encrypted token

Output

/** First Table – Scheme Returns**/

Parameter	Description
Schemecode	Unique code for scheme
S_NAME	Scheme Name
1WEEKRET	1 Week Scheme Return %
1MONTHRET	1 Month Scheme Return %
3MONTHRET	3 Month Scheme Return %
6MONTHRET	6 Month Scheme Return %
1YRRET	1 Year Scheme Return %
3YEARRET	3 Year Scheme Return %
5YEARRET	5 Year Scheme Return %

/** Second Table – Benchmark Returns **/

Parameter	Description
-----------	-------------

INDEX_CODE	Unique code for index
SYMBOL	Benchmark Index Name
1WEEKRET	1 Week Index Return %
1MONTHRET	1 Month Index Return %
3MONTHRET	3 Month Index Return %
6MONTHRET	6 Month Index Return %
1YRRET	1 Year Index Return %
3YEARRET	3 Year Index Return %
5YEARRET	5 Year Index Return %

GET PEER COMPARISON

This method is used to get the peer category comparison of schemes.

URL

<https://mf.accordwebservices.com/MF/GetSchemePeerComparison?CategoryCode={Categorycode}&token={token}>

Input Parameters

Parameter	Description
CategoryCode	Category code of scheme
Token	Encrypted token

Output

Parameter	Description
Amc_code	AMC code of scheme
Classcode	Category code
Schemecode	Unique identification code of scheme
S_Name	Scheme name
NAVRS	NAV
IncDate	Inception date
1WEEKRET	1 Week Return %
1MONTHRET	1 Month Return %
3MONTHRET	3 Month Return %
1YEARRET	1 Year Return %

3YEARRET	3 Year Return %
5YEARRET	5 Year Return %
INCRET	Since Inception Return %
MinInvestAmount	Minimum Investment Amount

GET NAV CHART

This method is used to get the NAV data for schemes.

URL

<https://mf.accordwebservices.com/MF/GetNAVChartData?schemecode={schemecode}&period={period}&token={token}>

Input Parameters

Parameter	Description
schemecode	Unique code of scheme
period	Period for data. Pass period as 3M for 3months, 6M for 6months, 1Y for 1year, 3Y for 3 years, 5Y for 5years, SI for Since Inception
Token	Encrypted token

Output

Parameter	Description
NAVDATE	NAV Date
ADJNAVRS	Adjusted NAV

GET SCHEME INFO

This method is used to get the basic data for funds which can be filtered using various input parameters.

URL

<http://mf.accordwebservices.com/MF/GetSchemeFiltered?schemecode={schemecode}&amccode={amccode}&assetcode={assetcode}&catcode={catcode}&optcode={optcode}&aumfrom={aumfrom}&aumto={aumto}&fundagefrom={fundagefrom}&fundageto={fundageto}¤tPage={currentPage}&pagesize={pagesize}&sortexpression={sortexpression}&sortdirection={sortdirection}&token={token}>

Input Parameters

Parameter	Description
schemecode	Unique Code for schemes (Refer GET SCHEME CODE below)
amccode	Unique code for AMC (Refer GET AMC CODE below)

assetcode	Unique code for Asset (Refer ASSET CODE below)
catcode	Unique code for Category (Refer GET CATEGORY CODE below)
optcode	Option code. Pass 1 for Growth or 2 for Dividend
aumfrom	AUM range. Start value (In crores)
aumto	AUM range. End value (In crores)
fundagefrom	Age of funds range. Start value (In years)
fundageto	Age of funds range. End value (In years)
currentPage	Used for paging. Pass an integer value. Pass empty for full result.
pagesize	Used for paging. Shows this number of records in the result. If passed empty, returns full result.
sortexpression	You can pass the column value here based on which sorting is made.
sortdirection	Pass 'Asc' for Ascending or 'Desc' for descending
Token	Encrypted token

Output

Parameter	Description
SCHEMECODE	Unique identification code for particular scheme
SCHEME_NAME	Scheme Name
CATEGORYCODE	Unique code for Category
CATEGORYNAME	Category Name
ASSET_TYPE	Asset type of Scheme
NAVDATE	NAV Date
NAV	Latest NAV
PERCHANGE	Change in %
NETCHANGE	Change
MININVT	Minimum investment
SIPMININVEST	Minimum SIP investment
RISKOMETER	Riskometer
1MONTHRET	1 Month return %
3MONTHRET	3 Month return %

6MONTHRET	6 Month return %
1YRRET	1 Year return %
3YEARRET	3 Year return %
5YEARRET	5 Year return %
INCRET	Since Inception return %
FUNDAGE	Age of fund
YIELD	Yield
AVGMATURITY	Average Maturity
MODDURATION	Modified Duration
AUM	AUM in Crores
EXPRATIO	Expense Ratio
SHARPR	Sharpe Ratio
JENSON	Jenson Alpha

SCHEME ISIN

API is used to get ISIN code of a scheme.

URL

https://mf.accordwebservices.com/MF/Get_SchemeISINDetails?schemecode={schemecode}&option=&token={token}

Input Parameters

Parameter	Value
schemecode	Unique code of the scheme
option	Optional Parameter. Keep blank.
Token	Encrypted token

Output

Parameter	Description
SCHEMECODE	Unique code of the scheme
S_NAME	Scheme name
ISIN	ISIN code
SERIES	DP, DR options
