

1. Updation Flag (last column in each file).

Flag	Description
A/O	For flag 'A' and 'O', based on primary key first check if the record is already present or not in table. If it is present then update, If not then Insert.
D	Based on primary key records has to be deleted.

2. Primary / Non Primary schemes

Accord has classified all schemes in two major part.

- A) Primary Scheme
- B) Non Primary Scheme

Whether scheme is primary fund or not is denoted by column Primary_fund (value T: True, F: False) in Scheme_details table.

Primary_fd_code column gives code of primary scheme for respective schemes.

Primary/Non-Primary schemes concept is followed for below tables. Information is maintained for primary schemes only. For non-primary schemes you have to refer information of respective schemes primary scheme information.

- Avg_maturity
- Mf_portfolio
- mf_sip
- mf_stp
- mf_swp
- scheme_aum
- Scheme_paum
- sect_allocation
- fmp_yielddetails
- Scheme_objective

3. NFO schemes in Scheme_details table.

- NFO schemes get identified where status as "Pending" in scheme_details table.
- Between NFO open date and NFO close date is the period of NFO.

- After NFO close date when any particular scheme NAV (price) available then we change status to “Active” else we keep status as “Pending” only and keep purchase flag NO (IsPurchaseAvailable=’N’).

4. DividendOptionFlag in Scheme_details table.

DividendOptionFlag	Description
Z	Growth Plan
Y	Dividend Re-Investment Only
N	Dividend Pay-Out Only
B	Both dividend re-investment & dividend pay-out

5. Status in Scheme_details table

Status	Description
Active	Schemes whose NAV is present
DraftOD	Those schemes for which Overdraft has been Filed in SEBI.
FV Change	Those schemes for which FV and RT code changed. (In this case, schemes will be available with old RT code).
Pending	NFO Schemes.
